SKILLS

PROFILE

Front-end developer with approximately 7 years of experience. Passionate about web and mobile development. Enthusiastic about any topics related to technology in general, from programming to automation and beyond.

EXPERIENCES

2023

SENIOR FRONT-END DEVELOPER -- PORTER GROUP

Period: Mar/2021 - Current

- Responsible for the maintenance, development, and enhancement of the application used by residents in a condominium. This application allows residents to view the condominium's cameras, open doors, receive visitors, and be notified about package deliveries, among other features.

SOFTWARE ENGINEER -- MERCADO LIVRE

Period: Nov/2022 - Feb/2023

- Responsible for maintaining and developing features for the internal control panel of Mercado Pago's corporate benefits system.

2022

SENIOR FRONT-END DEVELOPER -- GAMA ACADEMY

Period: Mar/2021 - Sep/2022

- Responsible for developing the architecture of a Design System/Component Library. Actively involved in the development and decision-making related to business rules and architecture of LMS and ATS systems.

- Responsible for driving improvements and fostering technical discussions to enhance projects; providing guidance and technical support for colleagues' professional development; conducting technical interviews with potential hiring candidates.

2021

FRONT-END DEVELOPER -- SORTE ONLINE

Period: Oct/2020 - Mar/2021

- Maintenance of a lotto services application developed in ASP.NET; SEO corrections and creation of a blog using Wordpress.

2020

FRONT-END DEVELOPER -- AVEC

Period: Nov/2018 - Oct/2020

- Responsible for the development, maintenance, publishing, and management of the 'Avec App', designed for appointments in beauty salons and barbershops, with an integrated e-commerce feature for beauty products purchasing. The application was integrated with the VTEX platform for product purchases.

2018

FULL-STACK DEVELOPER -- HOUPA!

Period: Oct/2016 - Oct/2018

- Responsible for coordinating the Front-End team and leading the initiation of the development of the 'Houpa!' application, an e-commerce platform catering to wholesalers in the fashion industry. Initially, the application was developed as a Progressive Web App (PWA) and later replaced by a version in React Native.

- Responsible for full-stack development of an ERP (Enterprise Resource Planning) system for internal control at a women's clothing manufacturing company, Unique Chic.

2016

WEB DEVELOPER -- ABYX

Period: May/2016 - Sep/2016

- Freelance full-stack web developer. Responsible for initiating and structuring an ERP (Enterprise Resource Planning) system for clothing manufacturing at Unique Chic company. The system's first version was developed using CodeIgniter 3, HTML5, CSS, and jQuery.

EDUCATION

2021

FIAP - DIGITAL GAMES

Technologist degree in Digital Game Development, Game Design, and VR/AR Development, completed in 2021, with a duration of two years. Prepared to develop interactive digital entertainment systems, both networked and standalone, including scripting and virtual character modeling with interaction in databases. Experience spans various fields, such as entertainment, commerce, advertising, and education.

2015

INTERNET COMPUTING TECHNICIAN

Technical course in Internet Computing at Centro Paula Souza - ETEC de Itaquaquetuba, lasting for 3 semesters. Focused on web programming, the course also covers subjects such as marketing, entrepreneurship, and website design development.
